

The water we drink from typical sources is very different from the water that constitutes 70% of our body. That water found within cells and around DNA is activated and is made of much smaller clusters that move in and out easily to deliver nutrients and remove waste in our body.

However, as we age and in the presence of diseases, we gradually lose this active micro-clustered water. Replenishing this loss will dramatically improve our health and vitality.

So safe, even your children can enjoy all the benefits without the need to boil!

Now, with eLife proprietary technology, you can drink to your pink of health with this activated water that revolutionizes your life with vitality!

## THE MAGIC IS IN THE MICRON

With a pore size of less than 0.2 micron, 99.999% of residues and bacteria in the water are filtered off. The silver element in the filter naturally sanitizes the water and no boiling is required. eLife silversol activated carbon block kills bacteria and prohibits further bacteria growth thereby enhancing the effectiveness of its filtration process.

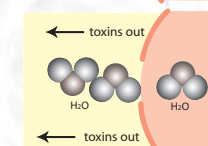

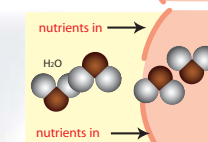

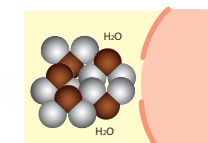

eLife multi function unit utilizes a unique element conversion technology, consisting of high-energy magnetizers, active rocks, energy

rocks, and sweet rocks. Operating on specific flow under the combined action of the materials, water molecule clusters are reduced dramatically from 13 molecules in ordinary water to 6 molecules in eLife water.

This converts it to 'small molecule water' or 'activated water' with high solubility and higher oxygen content, delivering nutrients effectively into cells, and assisting in the elimination of toxins and waste.

## THE BENEFITS
